

## Data gathering

Skyscraper

Artwork  
compositor

Game list  
generator

Frontend  
game list

“Skyscraper -p [platform] -s [scraping module]”

E.g. “Skyscraper -p snes -s screenscraper”  
or “Skyscraper -p snes -s thegamesdb”

“Skyscraper -p [platform]”

E.g. “Skyscraper -p snes”

“-s localdb” is implicitly added as it is  
the default scraping module

“localdb” is the module that scrapes  
exclusively from all cached data

## Data combining
